Good work done by the Peerless

Preserves That Will Keep.

This is the preserving season, when forehanded housewives put up all sorts of fruits in sweetments which make the tes table attractive all winter. In some seasons and with many fruits there is little trouble in making these preserves keep, but at other times it seems as if the greatest care were bound to be defeated and all skill were naught. The sweetments will ferment and spoil.

A chemist of this city, who has been making a special study of the life and growth of ferment plants, says the remedy for this is double boiling. This must be done with a certain reason and system. If proper precautions are not observed, he says, you might keep right on boiling the things time and again all the year round, and still they would spoil. Boiling will kill all the ferment plants that are developed from the spores, but it will not kill the spores.

Spores of ferment plants require only from eight to twelve hours to develop. If they are left longer than this, the spores will have become new plants and in turn have deposited new spores. To get rid of plants and spores, therefore, the preserves should have first a good boiling and be set away in sealed vesseis, and then about eight hours later be brought again just to a boiling heat. Treated in this way, the chemist says, no further trouble can occur unless new ferments get in from outside sources. -New York Sun.

Woman's Movement In Mexico.

Our sister republic to the south has been invaded by the movement for the enfranchisement of woman, and just now the movement is being discussed by the Mexican press with no little animation. The immediate cause of the present interest was the refusal of one of the city courts to license a young lady law student to practice before it. The writers of Mexico have long been urging the broadening of woman's sphere and advising ladies to enter positions which had hitherto been monopolized by the men. They were advised to become saleswomen, stenographers, bookkeepers, telegraphers, etc., and some two years ago, when a young lady graduated at a medical school and was admitted to practice medicine, the papers of the country had a good deal to say about the great advance in woman's

The great majority of them, however, indorse the opinion of the court, which does not want to see a female lawyer. They think that the legal profession is too near the ballot box, and that when women are allowed to practice law they cannot well be hindered from voting, which Mexico is a good ways from being prepared for yet. - New Orleans Pic-

Mrs. George Gould.

Mrs. George Gould has a new necklace that is positively dazzling and is said to contain some of the finest stones seen in England for a long time. It seems when the Goulds sailed to conquer English society Mrs. Gould, of course, had jewels, diamonds and neck-laces, for that matter. These were quite headaone, pain in the eyes, or well enough for America and Lakewood, have any difficulty in seeing or but would not do at all for anything so grand as England. So the order was given for something that was a shade finer than any necklace Mrs. Gould was likely to meet, and the result is another

feather in America's cap. It also seems that we are going to lose the Goulds; that English society has fallen so deeply in love with pretty Edith Kingdon that was, or she has found them so captivating, that the Goulds will not let their society laurels cool, and it may be a long time before New York society has the chance to take the Goulds by the hand and wel-

come them into the Four Hundred. In October they may shine on the United States, but in a few weeks will pack up the family wardrobe, its jewel cases and silver cases, cut some more coupons and hurry back to England .-New York Journal.

A Unique Dress.

The latest addition to the fashionable wardrobe is an odd garment made without sleeves. It's a chic affair, however, and bids fair to be very popular. The first bodice of this description was born in France. It was made of black chiffon over black lace. Flimsy bows of the chiffon graced each shoulder. These bows were the only semblance of sleeves which the bodice possessed. But, odd as the idea may seem, sets of sleeves were sold with it. They were all of some sheer material like chiffon or crepe de chine, but made according to a variety of designs.

One pair of sleeves were of white chiffon ruffles and had a soft, billowy appearance very effective. Another pair were very bouffant scarlet puffs. The bodice is to be worn with different skirts, and the idea is to have the sleeves match the shirt in color. The Parisian modiste is certainly unique. - New York World.

Catharine Cols.

The friends-and she has scores of them-of Catharine Cole (Margaret Field) will be pleased to learn that late letters from Bavaria, where she is now under treatment for a nervous malady, bring encouraging news. The change, rest and treatment are all proving beneficial, and Mrs. Field, in letters written by herself, gives evidence of seeming hopeful of the results of the experiment with Father Kniepp's remedies The relatives of this gifted and greatly beloved writer are indulging in the hope that she will come home at least on a fair way to recovery.

The Wrongs of Women.

Mrs. Charles Henrotin, the wife of a Chicago banker and herself a leader of society, recently addressed a socialistic meeting of over 1,000 men and women at Kimball hall, Chicago, upon the wrongs of women wage earners and the D. BOWES, Gen'l Western Passenger Agt., advantages of the eight hour law, re counting the results of her investigations in printing offices, sweating shops and other places where the working day is practically without a limit.

MYSTERIES!

The Nervous System the Seat of Life and Mind. Recent Wonderful Discoveries.

Recent discoveries have demonstrated that all the organs of the body are under the control of the nerve centers, located in or over the base of the brain, and that when these are deranged the organs which they supply with nerve fluid are also deranged. When it is remembered that a serious injury to the spinal cord will cause paralysis of the body below the injured point, because the nerve force is prevented by the injury from reaching the paralyzed portion, it will be understood how the derangement of the nerve centers will cause the derangement of the various organs which they supply with nerve force.

Two-thirds of chronic diseases are due to the imperfect action of the nerve centers at the base of the brain, not from a derangement primarily originating in the organ itself. The great mistake of physicians in treating these diseases is that they treat the organ rather than the nerve centers which are the cause of the trouble.

DR. Frankrim Milles, the celebrated specialist, has profoundly studied this subject for over 20 years, and has made many important discoveries in connection with it, chief among them being the facts contained in the above statement, and that the ordinary methods of treatment are wrong. All headache, dissiness, duliness, connecton, pressure, blues, mania, meliancholy, insanity, epilepsy, 81. Vitus dance, etc., are nervous diseases no matter how caused. The wonderful success of Dr. diles' Restorative Nervine is due to the fact that it is based on the foregoing principle.

DR. Milles' Restorative Nervine is due to the fact that it is based on the foregoing principle.

DR. Milles' Restorative Nervine is due to the fact that it is based on the foregoing principle.

DR. Milles' Restorative Nervine is due to the fact that of the principle of price, si per bottle, six bottles for 55, express prepaid. It contains saither opiates nor dangerous drugs.
